English Technical

## EDUCATION

Tashkent State University of Economics

2022 — 2026 · 4th-year student · graduating in 2026

## CERTIFICATES

DevOps

Uacademy · 30.10.2024

## PROFILE

IT specialist with hands-on experience in Linux systems, Oracle Database, monitoring systems and infrastructure automation. Experienced in building monitoring systems, working with Linux servers, installing and configuring Oracle databases, container technologies and infrastructure monitoring.

## EXPERIENCE

### Chief Specialist — Database Services Department

01.03.2023 — 16.10.2025

Tax Data Processing Center (SUE) under the State Tax Committee

- Working with Oracle Database at a Junior DBA level
- Writing SQL queries
- Installing and configuring Oracle Database
- Working with Linux-based systems
- Rolling out monitoring and automation systems
- Diagnosing issues and providing technical solutions to developers

### Monitoring Engineer

16.10.2025 — Present

Same center — Information Systems & Resources Monitoring Department

- Building and maintaining monitoring systems
- Automating systems
- Working with Linux servers and container environments
- Creating monitoring dashboards and alerting systems
- Participating in enterprise monitoring projects

## KEY PROJECTS

### OrionDB Pro

A professional Oracle Enterprise Manager replacement that monitors multiple Oracle databases from a single screen in real time. Built with Node.js, React and PostgreSQL.

Node.js · React · PostgreSQL · WebSocket · Telegram

### Monitoring & alerting systems

Grafana dashboards, Uptime Kuma and Telegram alert bots for critical situations — real-time monitoring of infrastructure and databases, plus automation.

Grafana · Uptime Kuma · Telegram Bot · Docker · Bash

## GOALS

- Earn Linux certifications
- Deepen my Oracle Database expertise and achieve OCP (Oracle Certified Professional) certification
- Master DevOps and modern technologies in depth
- Continuously grow and learn new things
